

Our unique manufacturing process offers ...

# ENDLESS BACKING OPTIONS.

## Ultra Loc™

Ultrafab's rigid backing allows for added locking power with three options of patented Ultra-Loc®. All can be inserted with Ultrafab's insertion equipment

- Solid polypropylene backing inserts more easily, saving time and reducing waste
- T-Loc® backing has a continuous series of tabs on each side of the backing which align and hold the backing in place
- T-Loc® is available in two versions, S7 which has a .078" tab or S9 which has a .093" tab for added holding power
- No possibility of off-center pile that binds, breaks or stretches in an extrusion
- T-Loc® is designed to be inserted by hand or by an using ULTRAFAB's patented pile insertion machine

### Size Options:

- Size 10 Ultra Loc™ - most aggressive for wide and varying T-slots (Available in .270"w & .187"w)
- Size 9 Ultra Loc™ - (Available in .270"w, .229"w, .210"w, .200"w, .187"w & .180"w)
- Size 7 Ultra Loc™ - for slight variation in T-slots dimensions (Available in .270"w, .210"w, .200"w, .187"w & .180"w)

## Ultra Grip®

single

double

- Solid polypropylene backing inserts more easily, saving time and reducing waste
  - Ultra-Grip® products have a series of perpendicular offsetting legs on the backing which hold the pile or profile tightly in the retention area
  - Ensures that pile is always on center and resists binding, breaking or stretching in an extrusion
  - ULTRAFAB's unique ultrasonic welding process assembles the fin, fibers and backing into an integrated, unified assembly that won't break apart during fabrication or while in use
  - Ultra-Grip®'s patented design can be inserted using ULTRAFAB's patented automation equipment
  - Product holds in place during cutting, welding and related fabrication operations. Slip resistance improves process efficiency
- Multiple ways to lock in Ultrafab weather-stripping during on-line insertion at the vinyl extruder:
- Single-sided Ultra Grip® – for use in shallow pocket T-slots (Available in .270"w, .255"w, .187"w & .180"w)
  - Double-sided Ultra Grip® – for use in all T-slots (Available in .270"w, .255"w, .187"w & .180"w)

## Ultra Pro®

Ultra Pro® – for use in tough T-slots with maximum locking capability

- Seamless splices reduce down time and increases process efficiency
- Rigid backing resists stretching and breaking
- Dimensionally stable for consistent holding power in every foot.
- ULTRAFAB's unique ultrasonic welding process assembles the fin, fibers and backing into an integrated, unified assembly that allows for strong continuous assembly

### Size Options:

- Size .270"w, .255"w, .187"w & .180"w

\* All backing options available in jumbo size reels that reduce changeover time and reduce waste.
