

Gold Series

Ultra Pile® and Ultra Fin® Weatherseals ULTRAFAB's answer for the most demanding applications

Designed for severe and extreme weather conditions:

- Direct exposure to sunlight in all climates
- Coastal exposure in hot and cold climates
- High humidity installations
- Northern exposure in snow-belt regions

The ultimate answer for these fenestration markets:

- High end residential
 - Multi-unit residential
 - Architectural
 - Light commercial
 - Heavy commercial
- **Weathering test performance exceeded AAMA 701-2000 requirements by 300 to 400% depending on fin selection**
 - GOLD SERIES pile uses state-of-the-art components and ULTRAFAB's unique ultrasonic technology to build an extremely durable, cost effective product
 - **High resistance to mold, mildew and fungus, in addition to superior sealing and compression set resistance**
 - Fins promote long term air/water infiltration protection
 - Pile height and backing width are always uniform because of ULTRAFAB's unique non-woven manufacturing systems
 - ULTRAFAB ultrasonically welds and assembles the fin, fibers and backing into an integrated, unified assembly that will not break apart during fabrication or while in use
 - **State-of-the-art automation equipment reduces labor costs, increases throughput and reduces repetitive motion injuries.** Choose either:
 - Off-line pile insertion at the fabrication point. or
 - In-line pile insertion at the extruder
 - Backing options that insert easily, but lock-in for secondary operations are available: Ultra Loc® for off-line use, Ultra Grip® for in-line use
 - **Every foot of GOLD SERIES product is marked for quality on the backing to ensure your high-end fenestration are using the best pile weatherseals**

Gold Series Weatherseal Choices

Pile Heights: .130 to .750 inch (3.30 to 19.05 millimeters)

Pile Densities: Light, Medium, High or Very High

Fin Options: Ultra Fin® - single pliable barrier
Ultra Soft Fin® - quiet non-woven fabric

Backing Widths: .187 or .270 inch (4.75 or 6.86 millimeters)
Special backing widths available

Backing Options: Standard Ultra Loc®
Ultra Grip® Adhesive Back

Standard Colors: Black, White, Grey

TO ORDER: See PART ORDERING SPECIFICATION SHEET
