

# Q Series

**Diamond or square baseskirt weatherseals eliminate the need for metal backed products**

- A totally robust weatherseal that uses compacted fibers and ULTRAFAB's unique pile directors to build an extremely durable, cost effective product
- Extra durable monofilament fibers can be blended with regular fibers for maximum resistance to compression
- Fins can be added to promote resiliency and long term protection from the elements
- Solid polypropylene base and "pile directors" provide a rigid backing with no need for an additional metal backing
- Pile height and backing width are always uniform because of ULTRAFAB's unique non-woven manufacturing systems
- Q Series pile weatherseal uses round yarns for optimal structural integrity and consistency which assures a tight seal and barrier against air and water infiltration
- ULTRAFAB's unique ultrasonic welding assembles the fin, fibers and backing into an integrated, unified assembly that won't break apart during fabrication or while in use

Diamond Skirt Base

Square Skirt Base

## Q Series Weatherseal Choices

### Pile Heights:

Inch	.300 to .750
(millimeters)	(7.62) to (19.05)

### Pile Materials:

Standard polypropylene  
– with monofilaments  
– with fin

### Pile Densities:

3 common densities available

### Backing Options:

Diamond or Square  
.115 x .115 inch  
(2.92 x 2.92 millimeters)

### Standard Colors:

Black, White, Grey, Brown, Beige

Custom materials, yarn densities, backing options and colors available for specific application requirements
