

# Ultra Service

**ULTRAFAB's commitment includes quality service**

**ULTRAFAB is totally committed to helping you SAVE labor, time and money in:**

## **MANUFACTURING and ASSEMBLY:**

- ULTRAFAB products are easier to insert than other weatherseals saving time and labor
- ULTRAFAB's automated inserting systems are terrific productivity builders for fabricators or extruders
- ULTRAFAB products do not stretch, shrink or leave tails after insertion into lineals which means less waste and scrap for you
- If you have out of tolerance T-slots, ULTRAFAB can supply most backing widths immediately to help you avoid waste
- If you need to make assembly line changes, ULTRAFAB will respond to your needs quickly, to help you avoid lost production time

## **PURCHASING and COST CONTROL:**

- ULTRAFAB's consistent, 100% quality for every product we ship saves time, labor and money for a total lower cost.
- ON-TIME SHIPMENTS mean you'll never be waiting for product. When ULTRAFAB makes a commitment, we deliver! If not, we pay the freight
- WORRY-FREE SERVICE programs are designed to help you reduce inventory carrying and handling costs. Working together we plan for your needs and produce ahead to make sure product is available when you need it
- Computerized production planning coupled with flexible manufacturing systems lets us respond to your product needs accurately and on time
- EMERGENCY SERVICE is available on an as needed basis and at no extra charge for our regular customers. Same day service is possible on a very limited basis
- SPECIAL LABELING and PACKAGING such as applying your own part numbers or bar code labels, and/or packaging your order to your specifications helps you save material handling costs

## **ENGINEERING and DESIGN ASSISTANCE:**

- ULTRAFAB's expertise is always available. We can work with you to custom design prototype products or configurations
- Our unique manufacturing methods provide you with capabilities and versatility you can't find anywhere else. Our engineering staff can use all these capabilities to help you redesign or design new products
- Tight tolerances are a specialty at ULTRAFAB. That's why you are assured of consistent, top quality products
