

Innovative Solutions for All Your Dust Plug Needs.

Ultrafab Dust Plugs

Ultrafab has the right product for your specific application needs. A properly designed dust plug applied in the right location in the overall sealing system can take your fenestration product's performance to a new level.

Dust Plug®

- Ultrafab's original dust plug - the foundation of our product line.
- Rigid backing designed for flat surfaces.
- Unique construction allows for custom fin placement in every row.
- Multiple fins create effective seal construction.
- Each row of pile has pile directors at the base to increase compression set resistance and improve long term performance.
- Available in a Fire Rated configuration.

Specifications:

Pile Heights:	.130" to .750"
Pile Widths:	.187" to 2.4"
Pile Densities:	Very High – custom densities available
Fiber Materials:	Polypropylene, Nylon, Fire-Rated
Fins:	Available in center and outside fin options for each pile row
Fin Heights:	Even or above the pile
Fin Options:	Clear PP fins or Ultra-Soft Touch non woven fins for quieter operation.
Colors:	Black, White, Grey, Beige, Brown

Ultra Bend L™

- Designed for high volume or unique applications that require solid performance without use of a fin.
- These cost effective durable plugs have flexible backing, allowing them to be mounted on a radius or a contoured surface.
- Heavy density allows for maximum air/water penetration control at a lower cost.
- Non-oriented continuous fiber-fill will seal effectively in all directions.

Specifications:

Pile Heights:	.130" to .590"
Pile Widths:	.250" to 4"
Pile Densities:	Very High
Fiber Materials:	Polypropylene, Nylon, Polyester, Teflon
Colors:	Black, White, Grey, Beige, Brown

Ultra Bend S™

- New patent pending process allows for custom fin placement where you need it!
- Control air and water leakage in problem areas with custom design.
- Flexible base material allows for mounting on contoured and uneven surfaces.
- New process allows for custom fin placement. Perfect for fenestration design engineers looking for custom solutions.
- Let Ultrafab assist you during the design phase of your project for custom options.

Specifications:

Pile Heights:	.130" to .750"
Pile Widths:	.500" to 2.0"
Pile Densities:	Very High – custom densities available
Fiber Materials:	Polypropylene, Nylon
Fins:	Custom placement where required
Fin Heights:	Even or above the pile
Fin Options:	Clear PP fin or Ultra-Soft Touch non woven fin for quieter operation.
Colors:	Black, White, Grey, Beige, Brown

Why Use Ultrafab Dust Plugs?

A sealing system is only as good as the sum of all its parts - enhance critical areas of the system with a dust plug from Ultrafab and achieve your fenestration product's highest performance rating potential. Call 1-800-924-7680 to take advantage of Ultrafab's free-of-charge test lab and increase the performance rating of your fenestration product.

ULTRAFAB®

Innovative Solutions for All Your Dust Plug Needs.

Ultrafab Dust Plugs

Ultrafab has the right product for your specific application needs. A properly designed dust plug applied in the right location in the overall sealing system can take your fenestration product's performance to a new level.

Dust Plugs Options

Adhesive Options:

3M PSA

A wide range of applications for the most demanding applications.

Hot Melt

Most cost effective and universal application use. Custom adhesives available for complex applications.

Foam Backed

Rough or contoured surfaces and applications which may require a little give during impact.

A Wide Range Packaging Options:

Continuous on a Reel

Allows for cutting to different lengths or sizes at the end user.

Individual Ready-to-Use Pieces

Individual pieces cut to the correct size and ready for use. Also available in kiss-cut or die-cut shapes.

Kiss-cut or Die-cut Continuous Backing

The best choice for a dedicated workstation with room to mount a reel of product. Easy peel and stick feature with a continuous backing for easy removal.

Individually Bagged

Kits can be bagged with one or more plugs in one or more sizes. A good choice for field service and critical manufacturing operations.

Ultrafab's application engineers are available to work with you to create a custom profile plug cut to your specific requirements.

Custom tooling design available.
