

ULTRA BEND[®] DUST PLUGS

Flexible mount dust pads with custom fin replacement

Ultrafab's addition to its family of custom dust plugs provided the end user with a customized approach of eliminating air/water penetration

The flexible based material allows the pad to fit firmly and permanently over uneven surface areas; ensuring proper mounting

ULTRA BEND DUST PLUG FEATURES:

- High density brush across surface eliminates orientation during assembly ensuring air flow is stopped and water from penetrating
- Flexible base allows for proper fit on uneven surfaces (i.e. welded corners and pockets)
- Flexible base combined with superior adhesive options allows the pad to fit securely to the application, eliminating "rise" that can occur with rigid based plugs.
- Allows for the "wrapping" of corners and other difficult to seal areas.
- Custom fin placement allows for dust plug design variation
- Ultrasonically welded polypropylene filament and fin assembly for industry leading durability and longevity
- **Pile Heights:** .170" (4.32mm) to .600" (15.24mm)
- **Base Width:** .375" (9.52mm) to 1.75" (44.45mm)
- **Fin Options:** Soft-touch and Clear fin
– up to 3 rows per plug
- **Custom placement of fin rows**
