## KEY ADVANTAGES

- Designed for high volume or unique applications that require solid performance.
- Heavy density allows for maximum air/water penetration control.
- Non-orientated continuous fiber-fill seals effectively in all directions.
- Flexible base material allows for mounting on contoured and uneven surfaces.

## PACKING OPTIONS

- **Continuous on a Reel:** Allows for cutting to different lengths or sizes at the end user.
- **Individual Ready-to-Use Pieces:** Individual pieces cut to the correct size and ready for use. Also, available in die-cut shapes and kiss-cut on a reel.
- **Individually Bagged:** Kits can be bagged with one or more plugs in one or more sizes. A good choice for field service and critical manufacturing operations.
