

## 1" Horizontal Bar Bottom Seal

### Retractable Storm or Security Shutters ■ Retractable Shade Systems.

Ultrafab's new F250 Horizontal Bar Bottom Seal is the obvious alternative to similar nylon seals. Our patented ULTRA CELL<sup>®</sup> polypropylene microcellular foam features better overall performance than any other weatherseal. This innovative product leads the industry in compression set resistance, weatherability, and color stability. The F250 conforms around rough surfaces, virtually eliminating light, air, and debris leakage over the life of the product.

**High end finished look  
previously unavailable  
with typical nylon  
bottom seals.**

#### Key Advantages

- Microcellular foam reduces noise and eliminates dust, water, and air movement
- Excellent compression set resistance for minimal loss of functional height over time
- Consistent and predictable low closing forces
- UV stabilized materials for long-term weatherability and color stability.
- Fully heat-weldable
- Suitable for use in all climates; will not absorb water
