The publication of the “candidate list” ((Article 59 REACH), Article 33(1)) obliges suppliers of articles to inform their downstream customers of the presence in the article of SVHC included in the candidate list above a concentration of 0.1 % weight by weight (w/w). Article suppliers have to provide their customers with sufficient information available to them to allow safe use, including, as a minimum, the name of the substance.

At present, 240 substances have been included in the candidate list. The candidate list can be consulted at the following address:

<http://echa.europa.eu/candidate-list-table>

Based on the information we received from our upstream suppliers and a review of the raw material Safety Data Sheets (SDS), none of these 240 substances or substances listed in Annex XIV is present in our articles (finished products).

Hereby we declare that Ultrafab Inc. does not test our finished products for the above regulation(s) but have information from our raw material suppliers stating that they do meet the regulation(s) and that Ultrafab does not intentionally add ingredients that do not meet the criteria. Should any changes come to the attention of Ultrafab, Inc. we will promptly inform our Supply Chain.
