OSHA's Hazard Communication Standard requires manufacturers, suppliers, and distributors to supply Safety Data Sheets (SDS) to customers for all hazardous products/materials that are anticipated to present a health hazard and/or physical hazard during intended normal use.

OSHA specifically exempts all non-hazardous “articles” from the requirement for an SDS to be produced and distributed. Articles are defined as:

The product must be a manufactured item meeting the following criteria:

- During manufacture, the article must be formed to a specific shape or design;
- The end-use functions are dependent in whole or in part on its shape or design; and,
- The product does not release or result in exposure to a hazardous chemical under normal conditions of use.

Under this exemption, Ultrafab does not offer Safety Data Sheets for our products as they meet the definition of an “article”.

This communication serves as notification that the SDS you have requested is not available since the product is defined as an article per OSHA.

Please contact me directly with any questions.
