ademello@ultrafab.com

All products manufactured by Ultrafab, Inc. do NOT contain or intentionally add PFOS, PFOA, or PFAS.

Hereby we declare that Ultrafab Inc. has not tested the majority of our finished products for the above regulation(s) but have information from our raw material suppliers stating that they do meet the regulation(s) and that Ultrafab does not intentionally add ingredients that do not meet the criteria.

We have tested some of our finished products for Total Organic Fluorine (TOF) by Combustion Ion Chromatography (CIC) - ASTM D7359:2018. This method provides an accurate and precise measurement of total PFAS levels present within consumer products including textiles and similar matrices. As PFAS chemicals contain organic fluorine, if the detected level of TOF is below the regulated limit of PFAS (50ppm), then no further analysis for targeted PFAS is needed. The following products **PASS** the PFAS TOF testing with levels less than 50 ppm.

Gold Series Weather Stripping	ECD-TPE Products	Adhesive
Black Series Weather Stripping	Specialty Products - Dust Plug	Japan with RDH Products
Natural Series Weather Stripping	Specialty Products with ADH	Specialty Products
Foam Products	John Deere Belt Products
