

KERF MOUNTED PILE

A wide variety of mounting options for every application requiring pile weatherstripping.

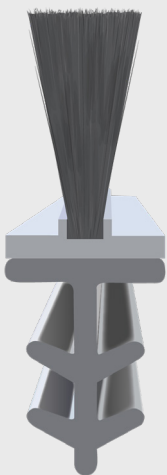

DESCRIPTION:

These seals feature a pile weatherstrip that is ultrasonically welded to a co-extruded base and is designed to conform to a wide range of gap conditions including areas where the gap tightens significantly. Its flexible construction ensures consistent performance across varied profiles, making it ideal for:

- Kerf style grooves
- Retention pockets
- Offset sealing applications
- Clip style mounting

Engineered for durability and smooth operation, this seal delivers reliable protection in both static and dynamic environments.

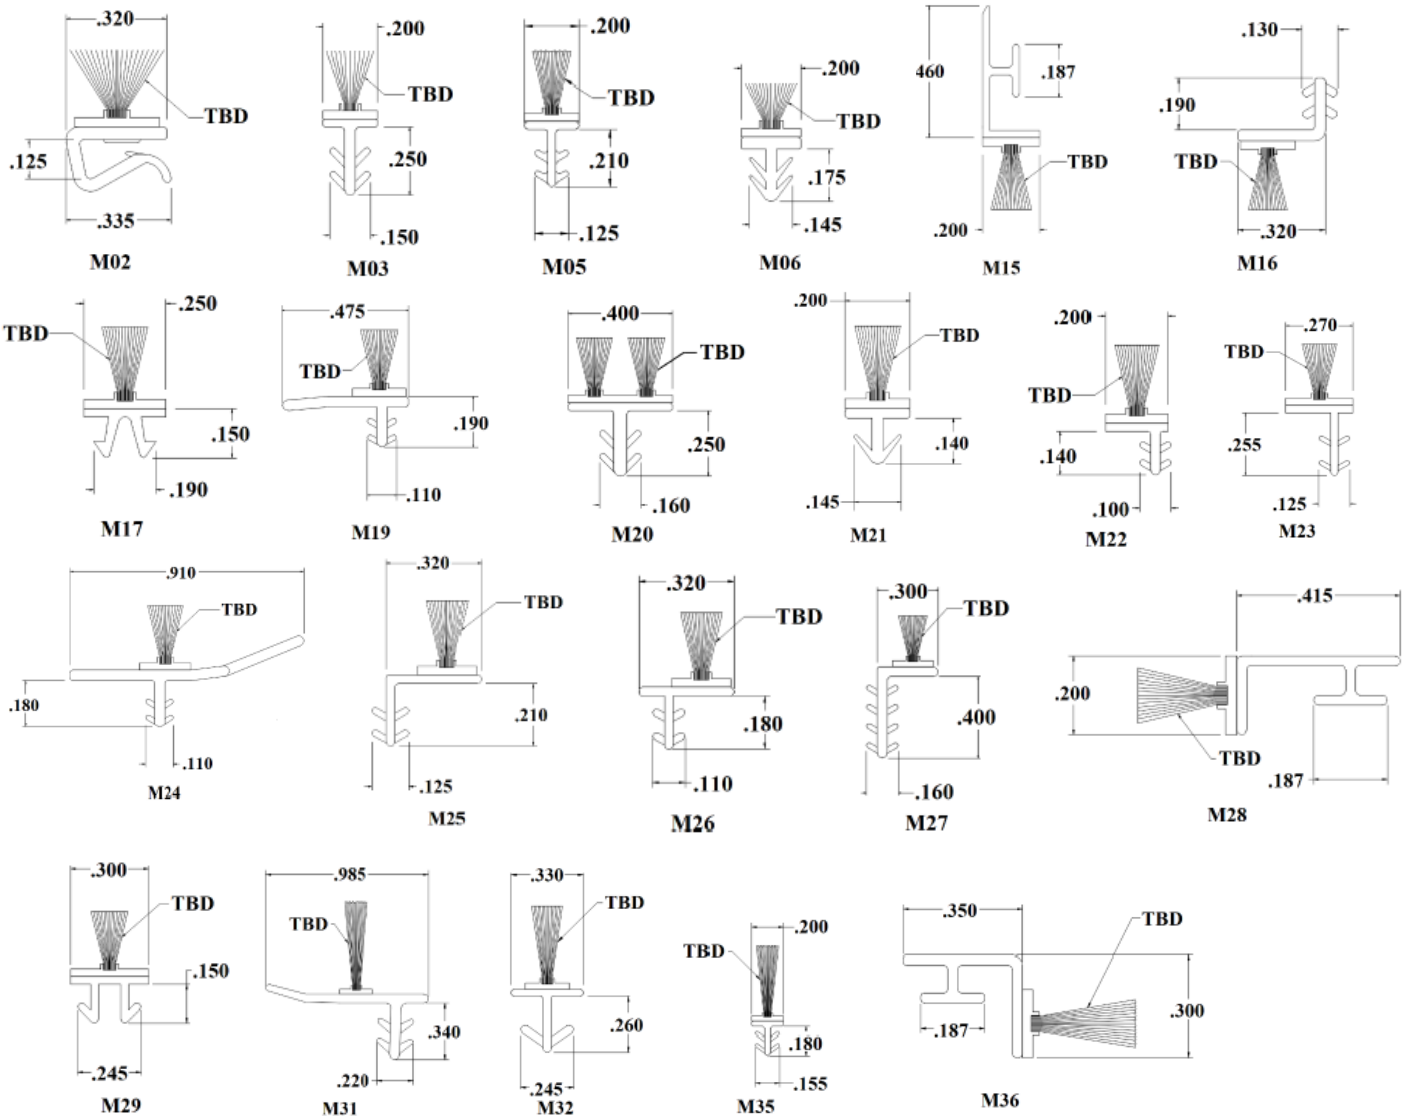

Key Features:

- Pile heights from .130" to .750"
- Co-extruded options for easy insertion
- Ultrasonically welded, won't break apart during use
- Available in all Ultrafab pile types
- Custom profiles available
- Cut to length or reeled
- Pile height and backing widths are always uniform because of Ultrafab's unique non-woven manufacturing systems
