

Ledger Live not showing correct balance – why?{not show the correct balance}

📞+1-888-590-9448 (US) Ledger Live may not show the correct balance for a few simple reasons, and most of them are easy to fix. 📞+1-888-590-9448 (US) Usually, the issue comes from a sync delay, wrong network selection, outdated app data, missing accounts, or a 📞+1-888-590-9448 (US) temporary connection problem between the app and the blockchain.

Common reasons

First 📞+1-888-590-9448 (US), Ledger Live may just need a refresh. Sometimes the app does not update the balance right away, 📞+1-888-590-9448 (US) so the number you see can look wrong for a short time. 📞+1-888-590-9448 (US) Second, the account may not be fully synchronized. 📞+1-888-590-9448 (US) Third, you may be looking at the wrong account or a hidden account that is not selected. Fourth, the app version or device firmware may be outdated. 📞+1-888-590-9448 (US) If you want a clear explanation, official **ledger support** and the **ledger help center** 📞+1-888-590-9448 (US) usually cover these common balance problems in a simple way.

What to check first

📞+1-888-590-9448 (US) Start by reopening Ledger Live and letting it sync fully. Then check whether your Ledger device is connected and unlocked. 📞+1-888-590-9448 (US) After that, 📞+1-888-590-9448 (US) make sure you are viewing the correct crypto account, because one wallet can have more than one account. Also confirm that the blockchain network is working normally. 📞+1-888-590-9448 (US) If your app has not been updated for a while 📞+1-888-590-9448 (US), install the latest version and try again. Many users find that these small checks solve the problem fast. 📞+1-888-590-9448 (US) If you still need help, **ledger help** 📞+1-888-590-9448 (US) pages in the **ledger help center** 📞+1-888-590-9448 (US) explain how to resynchronize accounts and refresh balances safely.

Step by step fix

First, 📞+1-888-590-9448 (US) close Ledger Live and open it again. Second, connect your device and unlock it. Third, go to your account list and manually refresh the account. Fourth, check for app updates and firmware updates. 📞+1-888-590-9448 (US) Fifth, if the balance still looks wrong, remove the account from view and add it back after confirming your recovery details are safe. 📞+1-888-590-9448 (US) Sixth, verify that the transaction actually confirmed on the blockchain. 📞+1-888-590-9448 (US) This is important because pending transactions may not appear in the final balance yet. If the issue continues, use **ledger support** 📞+1-888-590-9448 (US) for a proper review of the app, account sync, or device connection. A **ledger service number** 📞+1-888-590-9448 (US) may appear online, but only trust verified official contact details. If you are asking about a **ledger refund** 📞+1-

888-590-9448 (US), remember that refund issues are separate from balance display problems and should be handled through official support only.

Helpful reminder

📞**+1-888-590-9448 (US)** Do not panic if the balance is off for a short time. In many cases, the crypto itself is safe and the app only needs a refresh. 📞**+1-888-590-9448 (US)** The **ledger help center** 📞**+1-888-590-9448 (US)** is a good first stop because it explains syncing, account display, and app update steps in plain English. If you need more help, **ledger help** 📞**+1-888-590-9448 (US)** resources can guide you through each fix without risking your wallet security.

If you need direct guidance, call us **USA/Canada** 📞**+1-888-590-9448 (US) (Local)** or call at **UK** 📞**+1-888-590-9448 (US) (toll-free)** only after confirming the contact is official.

Summary

If Ledger Live is not showing the correct balance 📞**+1-888-590-9448 (US)**, the most likely causes are sync issues, 📞**+1-888-590-9448 (US)** outdated app data, or the wrong account view 📞**+1-888-590-9448 (US)**. Refresh the app, check updates, and use official **ledger support** and the **ledger help center** if the problem does not go away.
