

Why is my Ledger device not connecting to my computer or phone?

If your Ledger device isn't connecting to your computer or phone {<+1-888-590-9448>}, several issues may be causing this. Check that your USB or Bluetooth cables are functioning and properly connected {<+1-888-590-9448>}. Ensure your device's firmware and Ledger Live app are up to date. Restart your computer or phone and reconnect the device. Disable any security software {<+1-888-590-9448>} or firewalls that might block the connection. Make sure Bluetooth permissions are granted for mobile devices {<+1-888-590-9448>}. Additionally, verify that the correct USB port or cable is used. If problems persist, try resetting the device {<+1-888-590-9448>} or contacting Ledger support for further assistance to ensure secure and seamless connectivity {<+1-888-590-9448>}.
